Description: SSH Tunnel Builder is a simple to use tool that lets you create your own private SSH tunnels (without the need of a network) in a few seconds! Create your tunnels effortlessly and on-the-fly with SSH Tunnel Builder! Setup an SSH tunnel is very simple: Create an SSH tunnel between a remote server and a local computer, and configure it to allow incoming connections. SSH Tunnel Builder is very easy to use and doesn't require any kind of SSH experience: Simply connect to the remote server, and start "Connect to..." Wizard - and you are done. No more tedious SSH configuration or detailed tunneling guides: SSH Tunnel Builder guides you through the process, and quickly connects to the remote server through a secure connection. Great for secured network and local network communication (without the need of an SSH server), but also great for information exchange between you and your friends or colleagues even if the two computers are not on the same network. Multiple connections to multiple SSH servers is a piece of cake with SSH Tunnel Builder: The tunnels are created automatically and in background, to keep your work and the tunnel alive all the time. Great for local machines or networked computers, SSH Tunnel Builder can be used as a replacement for the PuTTY tunneling tool. You can publish your tunnel to others using your own public SSH key, so they can connect to the tunnel instantly without any hassle. SSH Tunnel Builder features: - Fast connection - Auto-detection - Easy setup - No more tedious SSH configuration - Multiple connections to multiple SSH
